

RFID DEMOKIT-2

RFID DEMOKIT-2 for Reading and Writing Eases your Design and Development!

Use it to quickly design your new product.

Use it to make “proof of concept” demonstrations.

Use it to make sales presentations.

Use it as a shop RFID Tag writer.

Use it to put RFID technology to work now in a
real application.

... the RFID Demokit-2 is a real development tool...

It includes:

- A fully functional reader/writer with antenna in an attractive desktop enclosure
- 10 Read/Write tags (10 ISORWCARDs)
- A 9V battery adapter
- A CD with simple software with source code example. Software code can be used in your application.
- User manual with comprehensive instructions.

All you need is a computer with a serial port, a serial cable and a power source (9-12 VDC, 60mA).

*Software example is in C++ for Microsoft Windows 9x, XP, Vista, C++.
A fully functional third party serial port terminal software is also provided.*
